WEDNESDAY, Oct. 5-P. M. To-day's Washington Treasury statement shows only a small loss from yesterday in the net balances; but of course it includes no payments for the 4 and 4 b per cent bonds offered to-day, which up to 1 o'clock amounted to \$1,411,350.
On July 1 the price of Chicago, Milwaukee and St.

Paul stock ranged from 883s to 89. To-day the price ranged from 7642753 to 7642764, exdividend of 2'e per cent. It is interesting to learn what, if any, basis there has been for the decline. In June the stock was traded in as a 5 per cent stock. Has there anything occurred to warrant a doubt of its remaining to be a dividend payer of 5 per cent! In the company's last year, ended payer of 5 per cent! In the company's last year, closes December 31, 1886, it earned over \$1,000.000 over and above the amount required to pay 5 per cent on its common stock. In the first six months of the current year its not earnings were \$162,220 greater than in the same eix months of 1886. The gross earnings of the company for the nine months ended September 30 this year were \$227,301 greater than for the same time of 1886, notwithstanding the decline in September from the phenomenal earnings of 1886. The additional interest charge on bonds is ued and 5 per cent on the \$10,000,000 of steek issued in July amounts only to about \$620,000, or \$400,000 less than nat year's surplus. And it is to be remembered that the properties for which the new bonds and stocks were issued are not yet contributary to the company's earnings. In the stock marker it believes the company's earnings.
